

20 QUESTIONS

ABOUT THIS ACTIVITY

Included in this document is a list of 10 energy efficiency-related words. Your students will have 20 opportunities to guess the word by asking you questions.

GOALS/OBJECTIVES

This activity encourages critical thinking and teamwork while allowing students to use their background knowledge on energy efficiency.

LESSON PLAN

What you need:

Word list:

1. Fossil fuel
2. Greenhouse gas
3. CO₂
4. Arctic
5. Global warming
6. Emissions
7. Net zero
8. Wind power
9. Solar
10. Hydro power

Instructions:

1. Review the “All about energy” presentation with your class to teach them the basics of energy efficiency. We can also come to your class to deliver a presentation; email us at hello@generation-e.ca if you’re interested!
2. Choose a word from the list or come up with your own.
3. Allow students to take turns asking you questions to figure out which energy efficiency-related word you chose.
 - a. They can ask questions like:
 - Is It a renewable resource?
 - Is it an energy-efficient product?
 - Is it a type of energy source?

Guessing the word counts as a question, so use your guesses wisely!
